

31 MARCH–4 APRIL 2025

NEW: TECHNICAL TEXTILES

WORLD. LEADING. INDUSTRYSHOW.

AN IMPORTANT PART OF THE MANUFACTURING INDUSTRY!

NEW IN HALL 2 AT HANNOVER MESSE 2025

Technical textiles are highly engineered textile materials specifically optimized for industrial applications. They are indispensable for the manufacture of innovative products and play a central role in many sectors of the manufacturing industry. Their versatility and performance make them key drivers of progress and efficiency. Take the opportunity to showcase your products, solutions and services at the new "Technical Textiles" group exhibit at HANNOVER MESSE. From 31 March to 4 April 2025, you will be the center of attention at Future Hub in Hall 2 – the heart of the show for cutting-edge technologies and innovative developments.

As the global meeting place for industry, HANNOVER MESSE is the ideal platform for industrial companies and service providers from all relevant sectors. It is where decision-makers and visionaries come together to shape the future of industry. The interdisciplinary approach of HANNOVER MESSE creates unique industry and customer contacts. Benefit from additional advantages such as carbon-minimized or neutral production, digitalized supply chains and short delivery times.

WHY TECHNICAL TEXTILES ARE ESSENTIAL

Today, technical textiles are essential for numerous branches of industry:

- **Automation:** Flexible and resilient textiles for efficient production processes.
- **Filtration:** High-performance filter media for clean and safe industrial environments.
- **Lightweight construction:** Weight-saving materials for the automotive and aviation industries.
- **Transportation:** Innovative textiles for safe and comfortable transportation solutions.
- **Smart wearables:** Intelligent textiles with integrated electronics for modern applications.
- **Medical products:** Hygienic and functional textiles for the healthcare industry.
- **Personal and occupational safety:** Reliable protective equipment for maximum safety in the workplace.
- **Innovative materials:** New material combinations for special requirements.

MEET THE INNOVATORS OF THE FUTURE

The industry associations ClubTex (France), Fedustria (Belgium), IVGT (Germany) and TexClubTec (Italy) support you in opening up new markets and demonstrating your innovative strength.
